Maritime Cyber Solutions

Is your yacht prepared for the risk of cyber-attack?

As part of the Bond TM Support and Services Group based in Monaco, Maritime Cyber Solutions (MCS) provide specialist maritime cybersecurity services to enhance cyber safety and security in yachting.

Whether you're looking to meet the technical security measures of GDPR, tackle the newly introduced cyber risk management requirements of the ISM code or to implement cybersecurity as part of a safety and security regime, MCS can help.

The IMO and many other "best practice maritime guidelines" suggest the first step should be to conduct a comprehensive cyber risk assessment. MCS offers bespoke services specific to yachting ranging from cybersecurity audits and health checks, assistance with cyber risk management plans, policies and procedures through to extensive cybersecurity reviews, incident response and investigation, and technical consultancy.

As a class-leader, MCS has become one of the first specialist maritime cybersecurity providers to offer yachting a GCHQ accredited Maritime Cyber Risk Awareness training course. This has been specifically tailored for crew and shoreside staff by Dr Paul Hunton with the assistance of Bond TM.
